Summary

Software engineer with 4+ years of experience delivering and owning full-stack .NET applications for enterprise clients. Primary developer for a production application — including its file processing, reporting, and data management — with additional experience contributing across a broader portfolio of 5+ systems. Led technical upgrade initiatives across 5 environments and mentored a junior developer on system and application knowledge. Skilled in C#, VB.NET, SQL, JavaScript/TypeScript, and Java, with a track record of resolving production incidents and building reusable tooling that cuts manual effort.

Skills

Programming Languages: C#, VB.NET, SQL, JavaScript, TypeScript, Java, HTML, CSS

Databases: SQL Server (T-SQL), Oracle

APIs: REST, NSwag

Frameworks / Libraries: .NET, Razor Pages, Spring Boot

Tools / Devops: Visual Studio, Visual Studio Code, Azure DevOps, GitHub Copilot, Git, GitHub, SSMS, Oracle SQL Developer, Docker, Maven, Windows 10 / 11, Linux (Ubuntu)

Experience

Deloitte - Mechanicsburg, PA

January 2022 - Present

Delivery Consultant, Software Engineering Solutions

June 2026 - Present

Previously: Solution Specialist (June 2025), Solution Analyst (January 2022)

- Serve as primary developer for a production application, owning triage, research, coding, and change requests with minimal oversight.
- Extend support to the broader application portfolio (5+ systems), contributing full-stack fixes and enhancements through 4+ maintenance releases per year, cross-application bug research, and recurring regression/QA testing.
- Led technical upgrade initiatives across 5 environments, implementing changes, coordinating testing, deployments and resolving errors. Created a tracker of ongoing team-wide initiatives, statuses and blockers, eliminating redundant status check-ins.
- Act as primary point of contact for file processing, report generation and data management on that application, resolving data errors through 500+ SQL scripts, developing custom and reusable templates to cut manual effort.
- Mentored a junior developer, assisting with onboarding, providing application walkthroughs and knowledge transfers.
- Triage and resolve production incidents by analyzing application behavior, reviewing logs and source code to identify root causes and solutions, providing additional support with log and SQL-based analysis to identify affected data.

Additional Projects at Deloitte - Java Web Application

August 2023 - August 2025

- Delivered full-stack features part-time on an internal Java/Spring Boot tool, helping higher-education clients migrate legacy financial reports to a modern format.
- Built a new web page and backend functionality using Spring Boot to capture and persist data to the application database.
- Resolved bugs and implemented new features. Worked with Docker, Apache Tomcat and Maven as part of the application's build and deployment stack.

Education

Shippensburg University (ABET Accredited)

Dec 2021 Bachelor of Science in Software Engineering
