Summary

Isabella Gingrich is a software engineer with 4+ years of experience developing and maintaining full-stack applications in .NET environments. Skilled in C#, VB.NET and JavaScript, with hands on experience supporting production systems in Agile teams. Proven ability to troubleshoot complex issues across front-end and back-end systems, contribute to release cycles and improve application stability through bug fixes and maintenance work. Demonstrates ownership and a continuous drive to learn.

Skills

Programming Languages: C#, VB.NET, SQL, JavaScript, TypeScript, Java, Python, C, C++

Tools / Devops: Visual Studio, Visual Studio Code, Azure Devops, Github Copilot, Git, Github

Hardware / Operating Systems: Windows 10 / 11, Linux (Ubuntu)

Productivity: Microsoft Office (Excel, Word, Powerpoint)

Experience

Solution Specialist, Deloitte – Mechanicsburg, PA

January 2022 – Present

- **Collaborated** in an Agile Scrum team supporting maintenance and enhancements releases across 5+ enterprise applications. Delivered fixes and improvements across the full stack, including frontend (JavaScript, TypeScript, Razor) and backend services (C#, VB.NET, SQL).
- **Executed** production release validation and deployment verification to ensure successful and stable releases.
- **Triaged and investigated** production incidents by analyzing application behavior, reviewing logs and source code, and perform SQL based analysis to identify root causes and determine a solution.
- **Owned** key client-facing processes, serving as the primary contact for file processing, report generation, issue resolution and data management. Acted as a lead developer for a core client application.
- **Developed** hundreds of SQL scripts to rectify data errors in the system at the clients' request. Create reusable templates to reduce the manual effort needed for data management.

Education

School – BS in Software Engineering at Shippensburg University

Dec 2021
